PROFILE

AI & ML undergraduate working across research, product thinking, strategy and design. Builds and studies systems (recommendation ranking, student–opportunity matching) and communicates them clearly.

EDUCATION

B.Tech Computer Science and Engineering (AI & ML) — SRM Institute of Science and Technology
2024 – 2028

PROJECTS

The Visibility Trap — research project

Python · Pandas · Streamlit

- Simulation study of how engagement-based ranking affects creator visibility and exposure inequality; compares engagement-first, exploration and exposure-aware ranking policies.
- Includes sensitivity analysis and reports limitations and a negative predictive result; simulation findings are not claimed as real-world causal effects.

Skill Passport / Campus Connect

Python · FastAPI · PostgreSQL · NLP

- Student skill and opportunity matching platform: resume processing, skill extraction, and TF-IDF / cosine-similarity matching of candidates to opportunities.
- Skill-specific challenges, profile visibility controls and candidate evaluation workflows.

EXPERIENCE

SRM Entrepreneurship Cell — Core Member, Creative & Events

May 2026 – Present

- Creative development and promotional communication; event planning and execution.
- Recruitment and outreach; campaign concepts; logistics and coordination.

SurgeSkills — Operations Lead & Creative Head

May 2026 – Present

- Market and competitor research; exploring student needs; early-stage positioning.
- Creative direction and operational planning.

SRM Journal Club — Research Lead

September 2025 – Present

- Visual identity and brand communication; educational social-media content.
- Event promotion and creative design; research presentations and academic discussions.

Nexwave Systems — Research & Development Intern

April 2026 – May 2026

- Feasibility research into unmanned vehicle development.
- Research into autonomous navigation and control systems.

SKILLS

Programming & data: Python, Pandas, FastAPI, PostgreSQL, Streamlit, JavaScript. **Methods:** NLP text processing, TF-IDF and cosine similarity, ranking simulation, sensitivity analysis. **Design:** posters, social-media creatives, branding and visual identity, editorial design. **Strategy & operations:** campaign concepts, market and competitor research, event planning.
